

MR MORRISON'S **VACCINE** **ROLLOUT** BS

Mr Morrison had two jobs this year. Rollout the vaccine and set up safe national quarantine, and he's failed both.

Desperate to cover up his vaccine rollout mistakes, Mr Morrison has shovelled a whole lot of BS out the door.

We compare Mr Morrison's BS and the Facts:

HERE ARE THE FACTS: ↓

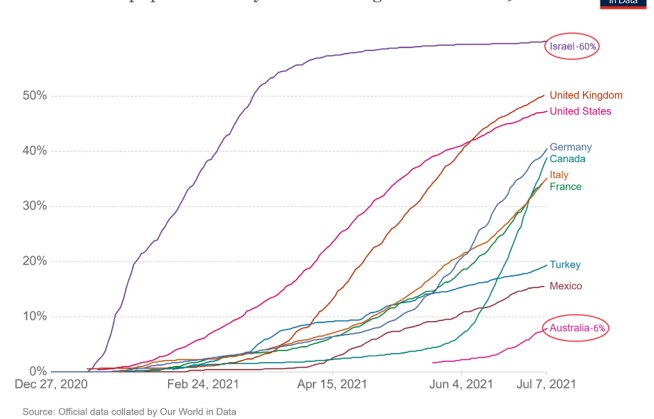

1 Mr Morrison's promised that 4 million Australians would be vaccinated by end of March.¹

↳ By the end of March, there were only 600,000 doses administered – some 15% of Mr Morrison's target.²

2 Mr Morrison promised that 6 million vaccine doses would be available for Australians by the 10th of May.³

↳ As of the 10th of May, only two and a half million vaccination doses had been administered. Nowhere near six million and nowhere near getting these people fully vaccinated.⁴

Share of the population fully vaccinated against COVID-19

3 Mr Morrison promised in November that Australia is at the “front of the queue” for vaccine deals.⁵

- But, Australia is ranked 113th in the world by the number of vaccine doses administered per head of population.⁶
- Australia is dead last amongst OECD countries.⁷
- Countries like the US, Japan and the United Kingdom were making Pfizer deals back in July 2020⁸, but, Australia didn't secure a Pfizer deal until the end of 2020, putting us at the back of the queue.⁹

4 Mr Morrison promised that all aged care residents and workers would be vaccinated by Easter.¹⁰

- The Government promised that the vaccine “rollout to aged care facilities will take approximately six weeks ... [and reach] more than 183,000 residents and 339,000 staff.”
- Only 45,000 aged-care residents were fully vaccinated by April 10.¹¹
- Mr Morrison later abandoned plans to provide vaccines directly to aged-care workers, and now only one-third of staff in aged care homes are vaccinated.^{12 13}

5 Mr Morrison appeared on multiple media outlets on 9 July amid reports that he had struck a new deal to bring additional Pfizer into Australia.¹⁴

- However, Pfizer contradicted Mr Morrison with this statement, “The total number of 40 million doses we are contracted to deliver to Australia over 2021 has not changed. We continue to work closely with the Government to support their rollout program.”
